

Callystro is looking for experienced and entry-level programmers/ freshers to extend its HTML5 / Javascript team. Ideal candidates should be self-starters, and able to operate and figure out stuff without too much hand-holding.

Responsibilities:

- Build/Port interactive games using HTML5/Javascript/PHP that run on Desktop, Tablet, and Phone
- Be involved in projects from concept to completion

Skills needed:

- Computer science degree or equivalent experience
- Programming experience using a canvas, javascript, and CSS3.
- Extensive design and game development experience
- Strong debugging and optimization abilities
- Strong English written and verbal communication skills
- Must be able to think critically and work in a face-paced environment

Interested candidates, please contact us (email below) with samples of your work.

About Callystro

Callystro develops creative, innovative and engaging solutions for the education and gaming industries. Callystro is run by professionals with close to 60 years of experience working for/ with top tier global companies. An informal office culture (yeah, no ties!), opportunities to learn and work on the latest in technology, create stuff that matters and be part of a company building process are some of the things you will enjoy while working here.

Our studio is located in Mangalore, India.
